Zurich IP Retreat 2023
The Measure of All Things

Friday 8th and Saturday 9th September 2023
Seehof Küsnacht (Zurich)

The Measure of All Things

The wonderful success of our last IP retreats on „The Hindsight Bias“, „Injunctions at a junction?“ and „Nationalism vs. Globalization in IP“ encourages us to invite again opinion leaders, including judges, academics, officials, litigators, patent attorneys, and in-house counsels, to discuss another central topic of intellectual property law.

The ultimate questions in IP, namely if and to what extent a creation or a designation deserves legal protection under patent, design, trademark and/or copyright law are to be answered by a human, but from the standpoint of fictitious persons. In patent law, this is the person of average skill in the art, in design law the average consumer with an interest in designs, in trademark law the average consumer, and in copyright it seems less clear. What are the underlying policy considerations, and where do they differ between the IP rights? How do practitioners cope with the task of putting themselves into the mind of a fictitious person? To what extent can empirical methods help to make this task a less subjective and more objective one? Is this fictitious person the same for the assessment of persistence of an IP right and for the assessment of the scope of protection?

Schedule

FRIDAY, 8th September

09h00	Introduction <i>Michael Ritscher</i>
09h15	Setting the Scene <i>Stefan Bechtold</i>
09h30	Tools for Making Decision Making in IP More Objective <i>Christopher Sprigman / Mark Schweizer (Moderator: Stefan Bechtold)</i>
